

6 WAYS THAT SCHEDULING SPREADSHEETS ARE COSTING YOUR HOSPITAL MONEY

Using spreadsheets to create physician on-call schedules negatively impacts your hospital's bottom line. In contrast, physician scheduling software delivers lower costs and added value.

1

DECREASED PATIENT SAFETY

Lower reimbursements

Higher readmission rates

Greater exposure to CMS penalties

2

HIGHER PROVIDER COSTS

Increased overtime

Higher burnout

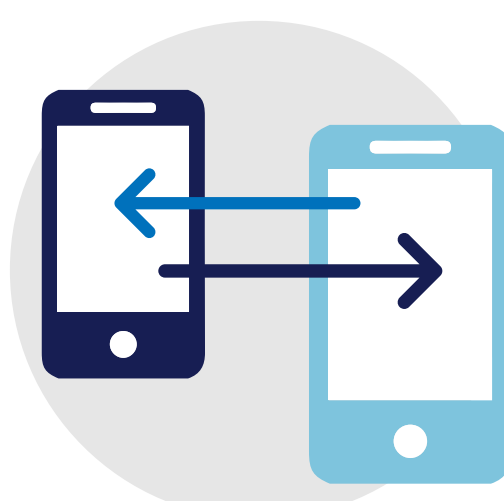

Lower productivity

3

POOR COMMUNICATION

More calls to the wrong physician

Increase in inaccurate switchboard transfers

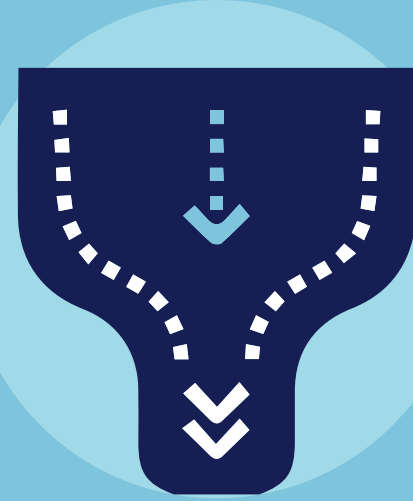

Slower message delivery time

4

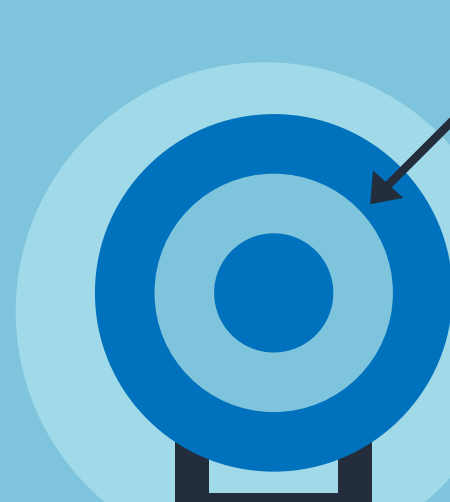

INFERIOR SCHEDULING PROCESS

Sluggish schedule creation

Schedule change bottleneck

Greater schedule inaccuracy

5

POOR EMPLOYEE UTILIZATION

Increased operator volume

Greater training time

More time reporting on schedules

6

LOWER PHYSICIAN RETENTION

Higher recruitment costs

Greater locum tenens needs

Higher onboarding costs
