

The Domino Effect of Contacting the Wrong On-Call Physician

If your hospital system frequently contacts the wrong on-call physician or uses the wrong contact preferences, the resulting domino effect has a negative impact on physician and staff morale, patient safety, and your bottom line.

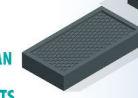

▶ **CONSTRUCTING PHYSICIAN SCHEDULES USING SPREADSHEETS OR PEN-AND-PAPER SETS UP A SYSTEM DESIGNED TO FAIL.**

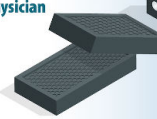

▶ **PHYSICIAN MORALE PLUMMETS**

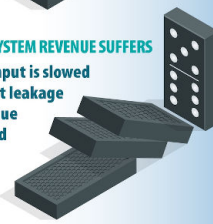

Physician can't indicate contact preferences
Outdated schedule leads to staff calling the wrong physicians
Scheduling errors contribute to physician burnout

▶ **PATIENT SAFETY IS IMPACTED**
Patient care is delayed while staff searches for the right on-call physician

▶ **HOSPITAL SYSTEM REVENUE SUFFERS**
ED throughput is slowed and patient leakage increases due to outdated schedules

DON'T LET THE 4TH DROP!

Physician scheduling software provides a single source of truth
