

BLUE SKIES AHEAD

4 Workflow Inefficiencies Solved by Cloud-Based Physician Scheduling Software

Workflow inefficiencies multiply when physician schedules are constructed using spreadsheets and other manual methods

1 Emails, voicemails, and texts about scheduling needs and preferences pile up, awaiting input into the schedule

2 Inefficient schedule distribution via email, fax, and printing and posting

3 Each change to the schedule requires manually updating the spreadsheet and redistributing the schedule

4 Inaccessible or obsolete schedules lead to more physician and department queries that require responses from medical staff office and switchboard personnel

Cloud-based scheduling software streamlines inefficient processes while saving money

REAL-TIME SCHEDULES

Physician schedules are available 24/7 from desktop and mobile devices, eliminating need for schedule distribution

SINGLE SOURCE OF TRUTH

Consistent communication across the health system virtually eliminates questions and second-guessing

ACCURATE CONTACT INFORMATION

Up-to-date preferred contact information prevents the wrong number or wrong physician from being called

LESS STAFF TIME

Thanks to automation, fewer full time employees are needed for scheduling

The MDsyncNET ADVANTAGE

Physician scheduling software that pays for itself

AFFORDABLE

Low set-up fees

SIMPLE TO LEARN

Only 1 hour of training needed

EASY TO USE

Scheduling swaps are a breeze

EXCEPTIONAL ADOPTION RATE

98% across hospital system
